

Assembly Instructions for #44PR Puppy Rail

Inventory: The #44PR Puppy Rail consists of (2) #PR48LB 48" long support bar with pre drilled holes (2) #48CB 48" long cross bar (4) 2", 3", 4", 5", 6" or 8" high legs **Note: Please make sure your entire inventory is complete.*

Step 1: Assemble the Puppy Rails #44PR as shown in photo above. This must be done prior to placing the Puppy Rail into the enclosure.

Step 2: Orient the assembled Puppy Rail so that the unit will set in the enclosure so that the two slotted rails are on the opposite walls containing the door panel.

Step 3: Place the Puppy Rail inside the enclosure as described in Step 2, and secure in place by snapping the slotted rails on the second bar in from the frame in four places on the exterior panels. Adjust the cross bars going thru the two side rails so that the frame is centered and square.

Congratulations! You are now ready to use your Rover Company #44PR Puppy Rails.
