

Assembly Instructions for Meow Manor #K644

Inventory: The Meow Manor #K644 consists of (9) #C48 48" high panel (1) #CD48 48" high single door panel (2) #F24 shelves (3) #C48C lids (top) (2) #S31 shelf support arm (16) #FDC fold down clips (8) #250 floor divider clips (58) #200 panel clips (3) #175 door clips The panels will already have been snapped together in a chain. **Note: Please make sure all your inventory is complete.*

Step 1: Separate the sections and stretch out the panels. Place the unit in the shape of a 4'x6' enclosure. Snap together all the #200 panel clips so the unit is together, (except for the door panel ...you will need to go inside the enclosure.)

Step 2: Step inside the enclosure and fold down flat the #FDC clips that are around the perimeter of the enclosure. The #F24 shelves will rest on the fold down clips. Take a #F24 shelf and place it to the left on the #FDC fold down clips with the flat side up (pipe side down). Snap on (2) #250 floor divider clips on either side of the #FDC fold down clips to support the shelf. Note: #250 floor divider clips are clipped to the underside of the shelf. There should be (2) #250 floor divider clips for every 2 foot space. (See figure 1 below **Note: view is from underside of shelf.*) Follow the same procedure with the right shelf.

Step 3: Attach the #S31 shelf support arms in the center section. The arms are attached with the cap end supporting the outside part of the shelf. (See *figure 2 below.*)

Step 4: Set the #C48C lids on top of the unit with the #200 panel clips facing down. Walk around the unit, snapping on the #200 panel clips as you go, and even up any sagging that might occur.

Congratulations: You are now ready to use your Kal-Ko Kathouse Meow Manor #K644 enclosure.
