

Instructions for Adding One Enclosure to Another Using a Common Wall Between Them.

The enclosed #250 divider clips are to add a second unit to the first enclosure.

Remove the #200 panel hinge clip from enclosure one from the side that will be dividing wall. Replace the #200 panel hinge clip with a #250 divider clip, but install them to the panels from the of unit one. This will allow the attachment of a third panel without the clips interfering with one and other.

Align the attaching panels of enclosure two with the front and back panels of enclosure one at the point of attachment.

Apply the #250 divider clips from the outside of the enclosures.
